ideal for students in clinical methods courses or professionals seeking a reliable reference handbook this bestselling text will prepare pre and in service practitioners to provide the best possible services for people with communication disorders cove

known for its practical applied approach the fourth edition of john venn s assessing student s with special needs continues to focus on how teachers can use assessment as a guide to instruction this noteworthy revision focuses on what

teachers really need to know to include assessment in the curriculum coverage includes all of the core information expected of an assessment text but the book goes far beyond the basics by addressing multicultural considerations technology and assessment high stakes testing and the reauthorization of idea the book clearly shows how assessment is more than giving a test to a child but is an essential tool for teachers as they help students achieve learn develop and grow

speech language pathologists have long been involved in providing services to children with communication disorders in the schools however a number of recent events have altered the practice environment including changes in national and state legislation shifting demographics an increase in the severity of disorders encountered advances in technology and a move toward curriculum based assessment the new edition of speech language and hearing programs in schools a guide for students and practitioners reflects these events the new editors contributors to the first edition have substantially updated and revised all chapters and have added new material on the re authorization of idea literacy acquisition pediatric dysphagia children from culturally diverse backgrounds who are increasingly represented in speech language pathology caseloads and much more the book also includes chapter objectives case studies and internet resources and is supplemented by an instructor s manual

living at the beginning of the 21st century requires being numerate because numerical abilities are not only essential for life prospects of individuals but also for economic interests of post industrial knowledge societies thus numerical development is at the core of both individual as well as societal interests there is the notion that we are already born with a very basic ability to deal with small numerosities yet this often called number sense seems to be very restricted approximate and driven by perceptual constraints during our numerical development in formal e g school but also informal contexts e g family street we acquire culturally developed abstract symbol systems to represent exact numerosities in particular number words and arabic digits refining our numerical capabilities in recent years numerical development has gained increasing research

interest documented in a growing number of behavioural neuro scientific educational cross cultural and neuropsychological studies addressing this issue additionally our understanding of how numerical competencies develop has also benefitted considerably from the advent of different neuro imaging techniques allowing for an evaluation of developmental changes in the human brain in sum we are now starting to put together a more and more coherent picture of how numerical competencies develop and how this development is associated with neural changes as well in the end this knowledge might also lead to a better understanding of the reasons for atypical numerical development which often has grievous consequences for those who suffer from developmental dyscalculia or mathematics learning disabilities therefore this research topic deals with all aspects of numerical development findings from behavioural performance to underlying neural substrates from cross sectional to longitudinal evaluations from healthy to clinical populations to this end we included empirical contributions using different experimental methodologies but also theoretical contributions review articles or opinion papers
